Main questions of our team: Values of COP? COP's rules? What resources could be used?

Next step of our COP developing:

1. Face-to face core-group meeting

Agenda: to describe criteria of high-quality rehabilitation; to know more about personal interests in COP and possible responsibility in team; how to formulate main interests and motivation of different target groups (practitioners, parents) and define how to connect the practice with academic world; to write actual plan together

2. Website developing for future communication
